

BC Children's Hospital *Compass Program*

Compass is a province-wide service to support evidenced based care to all BC children and youth living with mental health and substance use concerns. The program connects community care providers across BC to the information, advice, and resources they need to provide timely mental health and substance use care to children and youth (up to 25 years) close to home.

Information on the **Program Overview** can be accessed [here](#) and answers to **Frequently Asked Questions** are available [here](#).

Mental Health Resources available from Health Authorities
